The meaning of the Hawaiian or Sandwich Ishand word that stands at the head of this article is not translatable into any single expression in the English language. A description is required to do it full justice.

The lomi-lomi (pronounced low-tre-low-me), which as an institution is distinctively Polynesian; is a lexerious and healthful form of possive mo nion that is very much employed by the Huwamans. It is used as a remedial measure in the treatment of disease, as a reliet for fatigue, and as a layery and Cloce in hours of ease. It is a favor which travellers exchange with each other during the intervals of rest from the tollsome merch an act of kindness by which the wife monthes the fatigue, of her husband after his daily labors, a service which the chief claims from his liegensan, and which the king receives as a preregative from the hands of his subjects.

No one who has had experience as a Hawaiian traveller will not fail to agree that the crowning act of generous hospitality of this most hospitable people to the well-behaved stranger who sojourns in their midst, is the offer of the lomi-lomi. There are many ways of administering the lomi-

lumi. For our purpose, it will suffice to classify them under two divisions : first, the general : and, second the special. The special lomi lond is applied to any particular part affected, as to the head, in case of bendache, to any one of the limbs, or to any region of the body, in case of Jameness or strain. The position of the reciptort of tess form may be either sitting or reclining, as is most convenient; but, when the lomi-lomi is general. the patient lies on a mat or on some low couch. convenient for the mainpulator. Imagine yourself westied and exhausted by a long journey. hungry foot-sore, and lame in every muscle, to such a degree that no position seems to give rest. Under ordinary circumstances, the probability is timt too weary for sleep, you would spend the night in rolling wretchedly, and rise in the morning unrefreshed and unfit to proceed on your

Such would be the result in nine cases out of ten under the ordinary treatment of hospitality in civilized lands. But the Hawsiinne have an appreciation of the physiological wants of the wearied system, which it would be well for the people of other civilized and more enlightened countries to imitate. After water has been provided for washing and cooling purposes, or you have perbays immersed yourself bodily in some clear, flowing stream, and have regaled yourself with a delicionals broiled fish and a sufficient number of finger-dips into a calabash of pos-a favorite ar- ployment of the lomi-lomi icis of food made from a Polynesian esculent root, the kalo-the lumi-lumi is proposed as a mean of completing your refreshment and reno-"What is this?" you sek. You are dian elderly and experienced man or woman. The one who performs the lami loui seizes your feet

with strong hands, and commences manipulations ceed in frequency fifty or sixty in a minute. which are neither kneading, nor squeezing, nor reliking, but now like one and now like the other. Passing up to your body, the muscles of the calf, the thighs, the back, and shoulders, each in turn receives appropriate treatment. The degree of force used varies from the ten-

derest curess to the severest grip. To those parts which are the most lame and sore, the feeling may at times be on the verge of painful, and, when at first applied to the legs of the weary novice, may cause him to shrink and complain, just as the first scalding dash of hot water terrifies the nerves of fortable. the inexperienced Turkish bather. But, by the 2. Yield the muscles passive and relaxed into time the kahung iomi-lowi (lomi-lemi doctor), the hands of the manipulator. has made one round, all distrust is gone, and you only regret that the delightful process must so possible; for it is greatly under control, and deseen come to an end. One skilful in the art of creases under the exercise of the will, but becomes lami-lomi comes to possess a kind of tact that en- stronger and more troublesome if indulged. ables him to graduate his touch and force to the each muscle, at another he skilfully presents only painful. the rounded eminences of his palms, and soothes you with the magnetic influence of a gentle, unday -the stiffness, and lameness, and soreness.

power to enable one to sleep, so that on the fol- Galveston which contains over 200 balls. lowing morning you rise from your hed of clean Hawalian mate with a feeling of freshness and rest that is quite surprising. Your muscles are suppie, and your joints have an ease of motion that is unwouled. You are, in fine, ready to com- HAVE on hand the following articles mence another day's journey.

It is not uncommon for the patives to lie with their form toward the ground, and have a child or youth of moderate weight walk over them from the beels to the maps of the neck, trampling them under toot, as grapes are trodden by the feet of the wine makers. This, although an inexplicable and alarming sight to the povice, we recon moved as a most effective and salutary method # employing the lomi-lomi, especially appropriate when the inmeness or weariness affects the back. the loses or aboulders.

The native Hawaiians are such firm believers an the remedial virtues of the lomi-lomi, that they occasionally cause injury by using it wrongly. Ther sometimes defeat the ends of the surgeon who would seenre perfect rest for a fractured limb, and prevent the union and consolidation of the bone by their untimely manipulations.

The Hawaiians are a famous race of swimmers, and, each is their ability to maintain themselves for a great length of time in the water, that, to the foreigner, they seem almost amphibious. On the long swims which parties of them have been 100 BARRELS PRIME PORK compelled to make, when one of their vessels has foundered at sea, if a member of the party shows signs of exhaustion and failing strength, the others gather about him and administer the invigorating manipulation of the lomi-lomi, while sustaining him in the water, after which the whole company proceed on their watery way together,

The lumi-lumi is a most excellent and, I might almost sur, sufficient substitute for exercise. At any rate, as an adjunct to the various forms of voluntary exercise, it has a value beyond compute. It is capable of appeasing and satisfying that sense of muscular enaut-to coin a phrasewhich results from a craving for active physical

The great size and magnificent muscular development of the Hawalian chiefs have always been the subject of remark by foreigners. So much greater are their physical proportionssome have estimated the difference as great as twenty-five per cent.-than that of the people at lurge, whom certainly none would reckon as below the average in strength and size, that some have proposed, in explanation, the theory that these chiefs are the decendants of a superior conquaring race. But we are acquainted with nothing either in the language or traditions of the Hawaiians that gives ground for this hypothesis-The more plausible theory is that which accounts for this superiority mainly by the two facts of an abundant and regular supply of food, and their constant use of the lomi-lomi. The two condi-

tions essential to ample physical development are "first food : and second exercise. These must on the one hand, be abundant in quantity as well as of the proper quality; and, on the other hand, they must be regular in supply. It is fatal to sucess if either be intermittent.

These two conditions, we shall see, were insnred to the Hawaiian kings and chiefs from generation to generation, and to few or none of the common people. Their authority and wealthenabled them always to support about them a body of retainers, to some of whom belonged the duty of ministering regularly to them with the lomi-

In the same way also they were secured against the daily privations and the recurrent famines that afflicted the people as the result of Improvidence or drought. In the case of these chiefs, the lomi-lomi seems to have been an institution admirably adapted to counteract the evils which would otherwise have accrued from the frequent intervals of indolence and ease into which there was every temptation for them to fall, by furnishing them with a means of obtaining the advantages of exercise without the labor and fatigue of personal exertion, and at the same time of correcting the evils of laxury or overfeeding. Thus the high-fed, luxurious chief, when indisposed to seek exercise in the usual way, or when suffering from the effects of over-exertion, could stretch himself apon his mats and summon his attend ants to work up his muscle, and administer to his passive frame the exercise needed for its re-

But, not to indulge in rhetorical flourishes, the lomi-iomi, without mystery, acts on the most self-evident principals of physiology. It helps to unload the engarged veins and capillaries of the blood, which after severe exercise, is more than usually charged with impurities, and thus facilitate the renovation of the tissues, and especially the muscle, by making room for the return of arterial blood needed for remir.

Almost every one knows what immediate re lief from the numbness and powerlessness of a limb that is usleep is obtained by striking it briskly faom the periphery toward the centre. If any one has not, the next time he wakes at night, and finds his arm sleep from being lain upon, let him try the experiment, and he will experience one of the single and almost instant benefits of lonn-lomi.

How much of the virtue of lomi-lomi is to be exp'nined by the principles of animal unquetism we leave for those to determine who are versed in such matters.

For the benefit of those who may wish to try it, we append the following directions for the em-

1. To the Operator .- I. When treating the limbs, let munipulations be applied in such a direction as to drive the blood toward the heart. 2. The pressure or grip of the operator must vation "What is this?" you ask. You are di-rected to lie at full length on a mat, and are im-not be continuous; and there must be on appremediately taken in hand by the artist, generally ciable interval of time between one motion and the succeeding one.

3. The grips, or pressures, had better not ex-4. The force of the manipulations must never be so great as to cause pain.

5. Avoid unpleasantly tickling the patient. 6. When applying the lami-lumi to the head, use the rounded prominences of the hands and

7. Always consult the comfort of the patient, and be guided by his sensations in modifying the force and form of the manipulations.

II. To the Potient .- 1. Take that position, whether reclining or sitting, which is most com-

3. Resist the feeling of tickling as

4. Take notice of the different forms of maniwants of each case. At one moment his finger. pulation, and immediately report any that are points seem to dip down deeply and individualize particularly pleasant as well as those that are

Is some of the districts of Georgia where the upland cotton is extensively cultivated, the soil having dulatory motion. The skilful performance of lomi-lomi prevents the usual unpleasant effects of ex-crops, guano has been used. The consequence is reremove exertion from being felt severely the next ported that the crop has been seriously damaged by rust. Texas however, appears to be the cotton plant-It also seems to import a sufficient nervous er's paradice. A cotton stock is on exhibition a
